Gary,
This is not preliminary data, they are the analytical results. Everything we tested was below the permissible limits, so I plan to send this data to several sites and then we will decide the next step. I am not expecting any additional notes. If you have questions on the testing method please feel free to contact the lab directly : Chemtex lab-contact is Mohan (409) 332-8891.
Thank you,
Ruben Fernandez

Ruben:

I am assuming that this is a preliminary data set. Do you know when you will get the final with all the lab notes that describe problems they may have had with the matrix etc?

I know you just got your data back and it may take a little while to determine your next steps. Please let me know as soon as possible what Dana intends on doing with the waste in those frac tanks.

Thanks

Ruben

Can you let me known about when you expect your data back from lab.

Gary
